The Power of the Individual

Early Access Program Survey Results

All Up Value

- 70% are more **productive**
- 68% improved the **quality of their work**
- 37% feel more **fulfilled at work**
- 71% spend less time on **mundane tasks**

Value by Workflow

- 64% spend less time **processing email**
- 75% spend less time searching for **information in their files**
- 84% find it easier to **take action after a meeting**
- 3.8x faster at catching up on **missed meetings**
- 85% get to a good **first draft faster**

Value by Role / Function

- 79% reduced their **administrative workload**
- 68% keep their CRM **up to date with less effort**
- 67% spend more time with their **customers**
- 64% better **personalize customer engagements**

How much is Copilot worth to users?

77% Choose Copilot over free lunch

77% Would not want to go back to **working without Copilot**

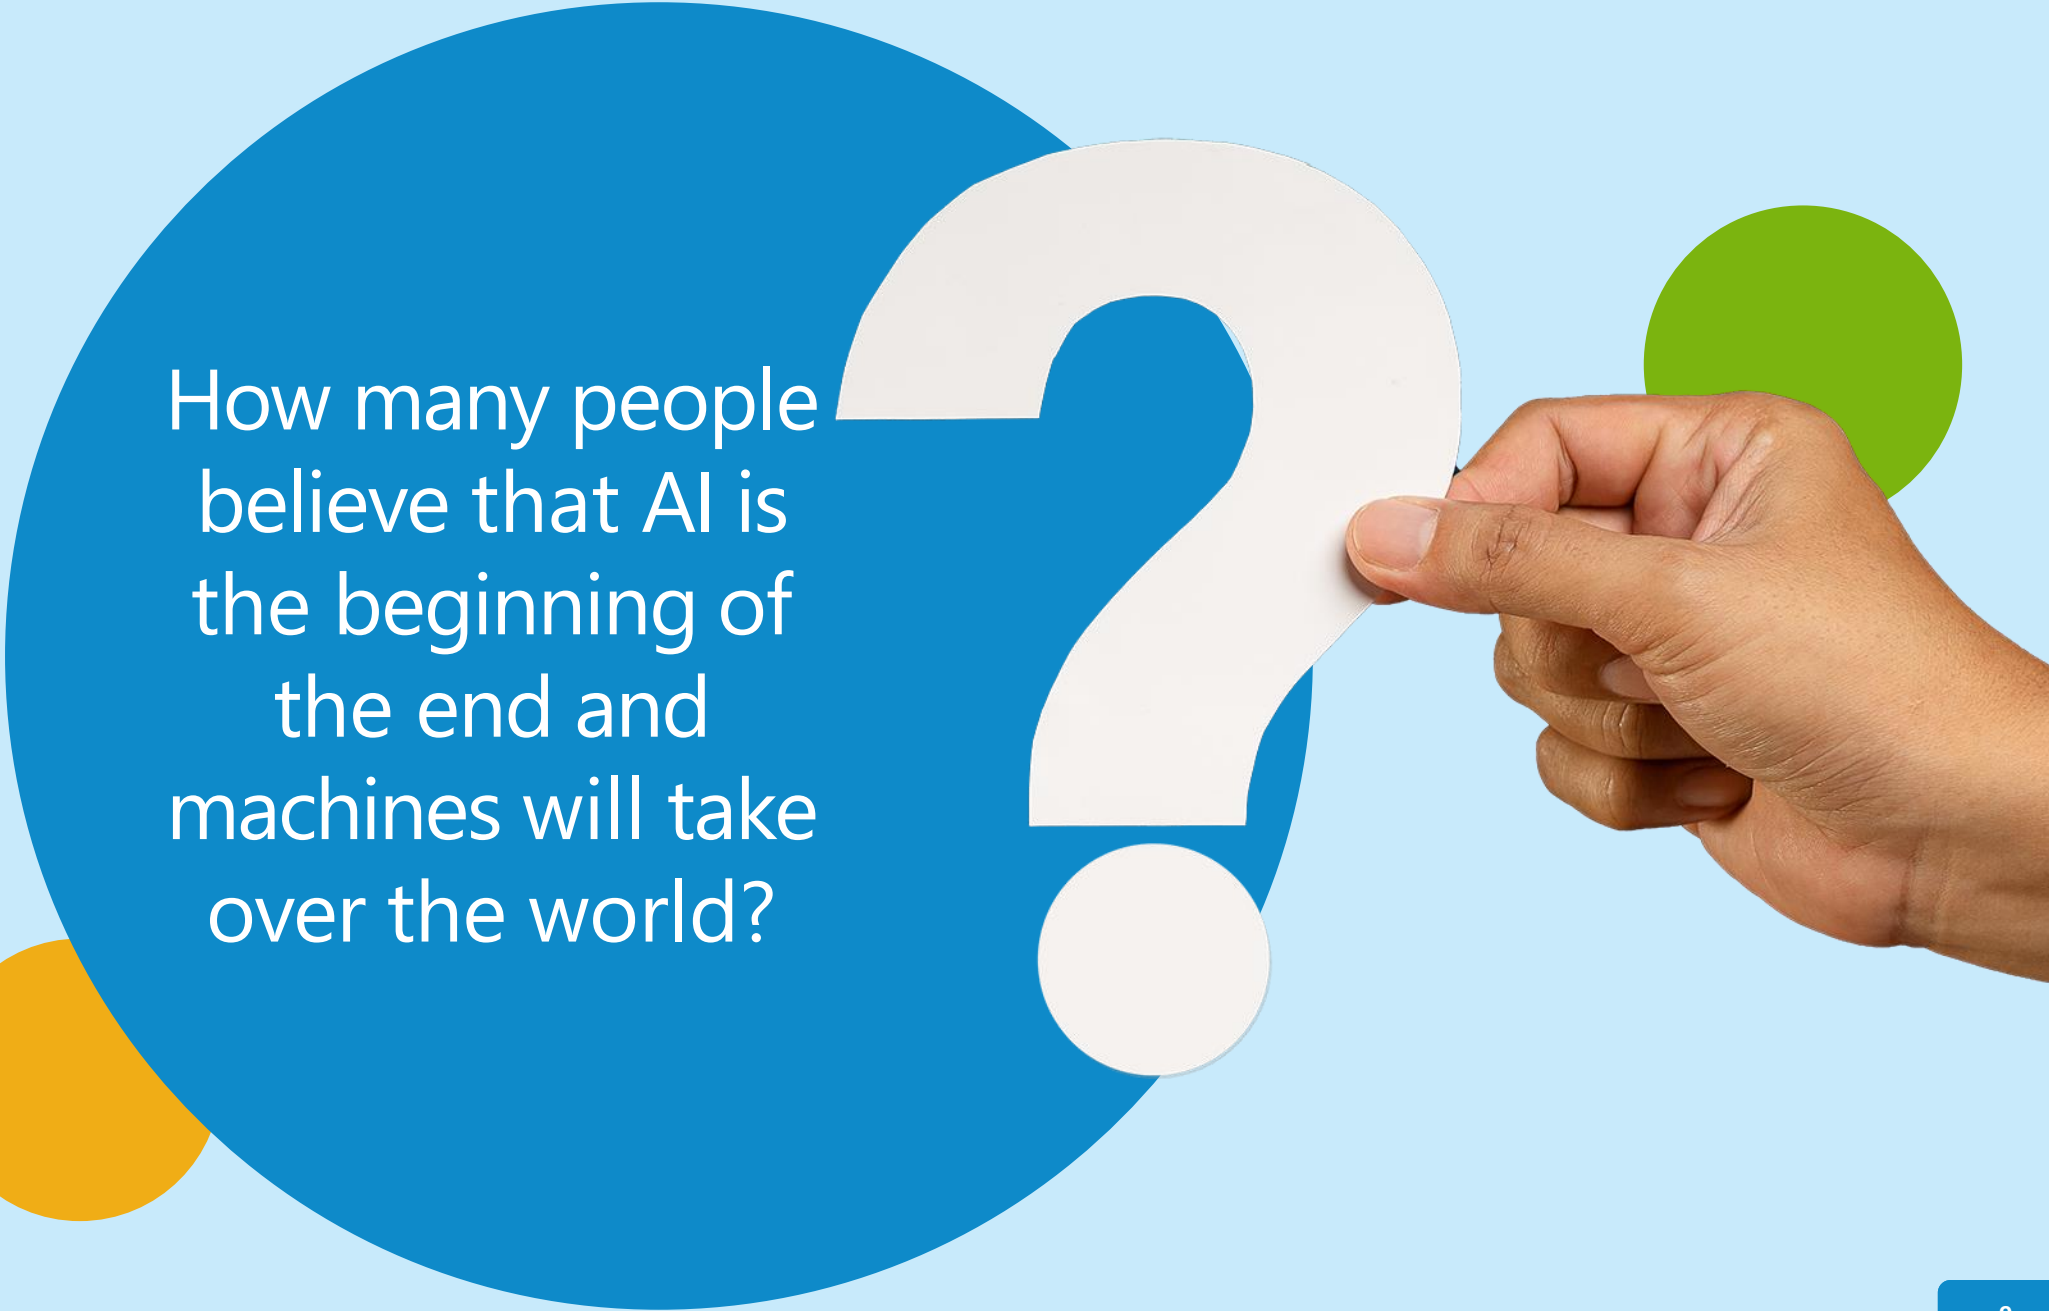

30% Access to Copilot would influence my **choice of employer**

We don't expect
humans to be
perfect but we
Expect AI to be

AI is only as good as the **data it can access**

A hand is holding a large white question mark cutout against a blue circular background. The background is decorated with a yellow circle on the bottom left and a green circle on the top right. The text is centered within the blue circle.

How many people
believe that AI is
the beginning of
the end and
machines will take
over the world?

**We need to design
the governance
around responsible AI**
*before the government tells
us how to do it...*

Alignment of our efforts with the White House Voluntary AI Commitments

Blue checkmark denotes our additional commitments

Safe

White House Voluntary AI commitments

Companies choose to conduct red-teaming, share trust and safety information, and help people identify AI-generated content

Microsoft commitments

- ✓ Test our systems using red-teaming and systematic measurements
- ✓ Contribute to industry efforts to develop evaluation standards for emerging safety and security issues
- ✓ Implement provenance tools to help people identify AI-generated audio or visual content
- ✓ Implement the NIST AI Risk Management Framework
- ✓ Implement robust reliability and safety practices for high-risk models and applications

Secure

White House Voluntary AI commitments

Companies choose to make investments to protect unreleased model weights, and incent the responsible disclosure of AI system vulnerabilities

Microsoft commitments

- ✓ Ensure that the cybersecurity risks of our AI products and services are identified and mitigated
- ✓ Participate in an approved multi-stakeholder exchange of threat information
- ✓ Support the development of a licensing regime for highly-capable models
- ✓ Support the development of an expanded "know your customer" concept for AI services

Trustworthy

White House Voluntary AI commitments

Companies choose to be transparent about system capabilities and limitations, prioritize research on societal risks, and develop and deploy AI systems for the public good

Microsoft commitments

- ✓ Release an annual transparency report on the governance of our responsible AI program
- ✓ Design our AI systems so that people know when they are interacting with an AI system and be transparent about system capabilities and limitations
- ✓ Increase investment in academic research programs
- ✓ Collaborate with the National Science Foundation to explore a pilot project to stand up the National AI Research Resource
- ✓ Support the development of a national registry of high-risk AI systems

With each great innovation wave there has been backlash

Early 1800's, 80% of the population farmed then the plow, cotton gin etc
What will we do?

1870 Edison first light bulb or lamp is revealed
You will burn down cities!

1907 Henry Ford's first model T rolled off the assembly line
You will never replace the Horse!

The Radio
People will stop reading!

The Telephone

What do you need a telephone for just walk down the street
It's the Devil!

The TV

You have a radio!

Oppenheimer

Elvis Presley
Viva Las Vegas!

The Mainframe Computer

The PC and Laptops

Email, Cell Phones and Social Media

Artificial Intelligence

The last best experience

that anyone has anywhere becomes

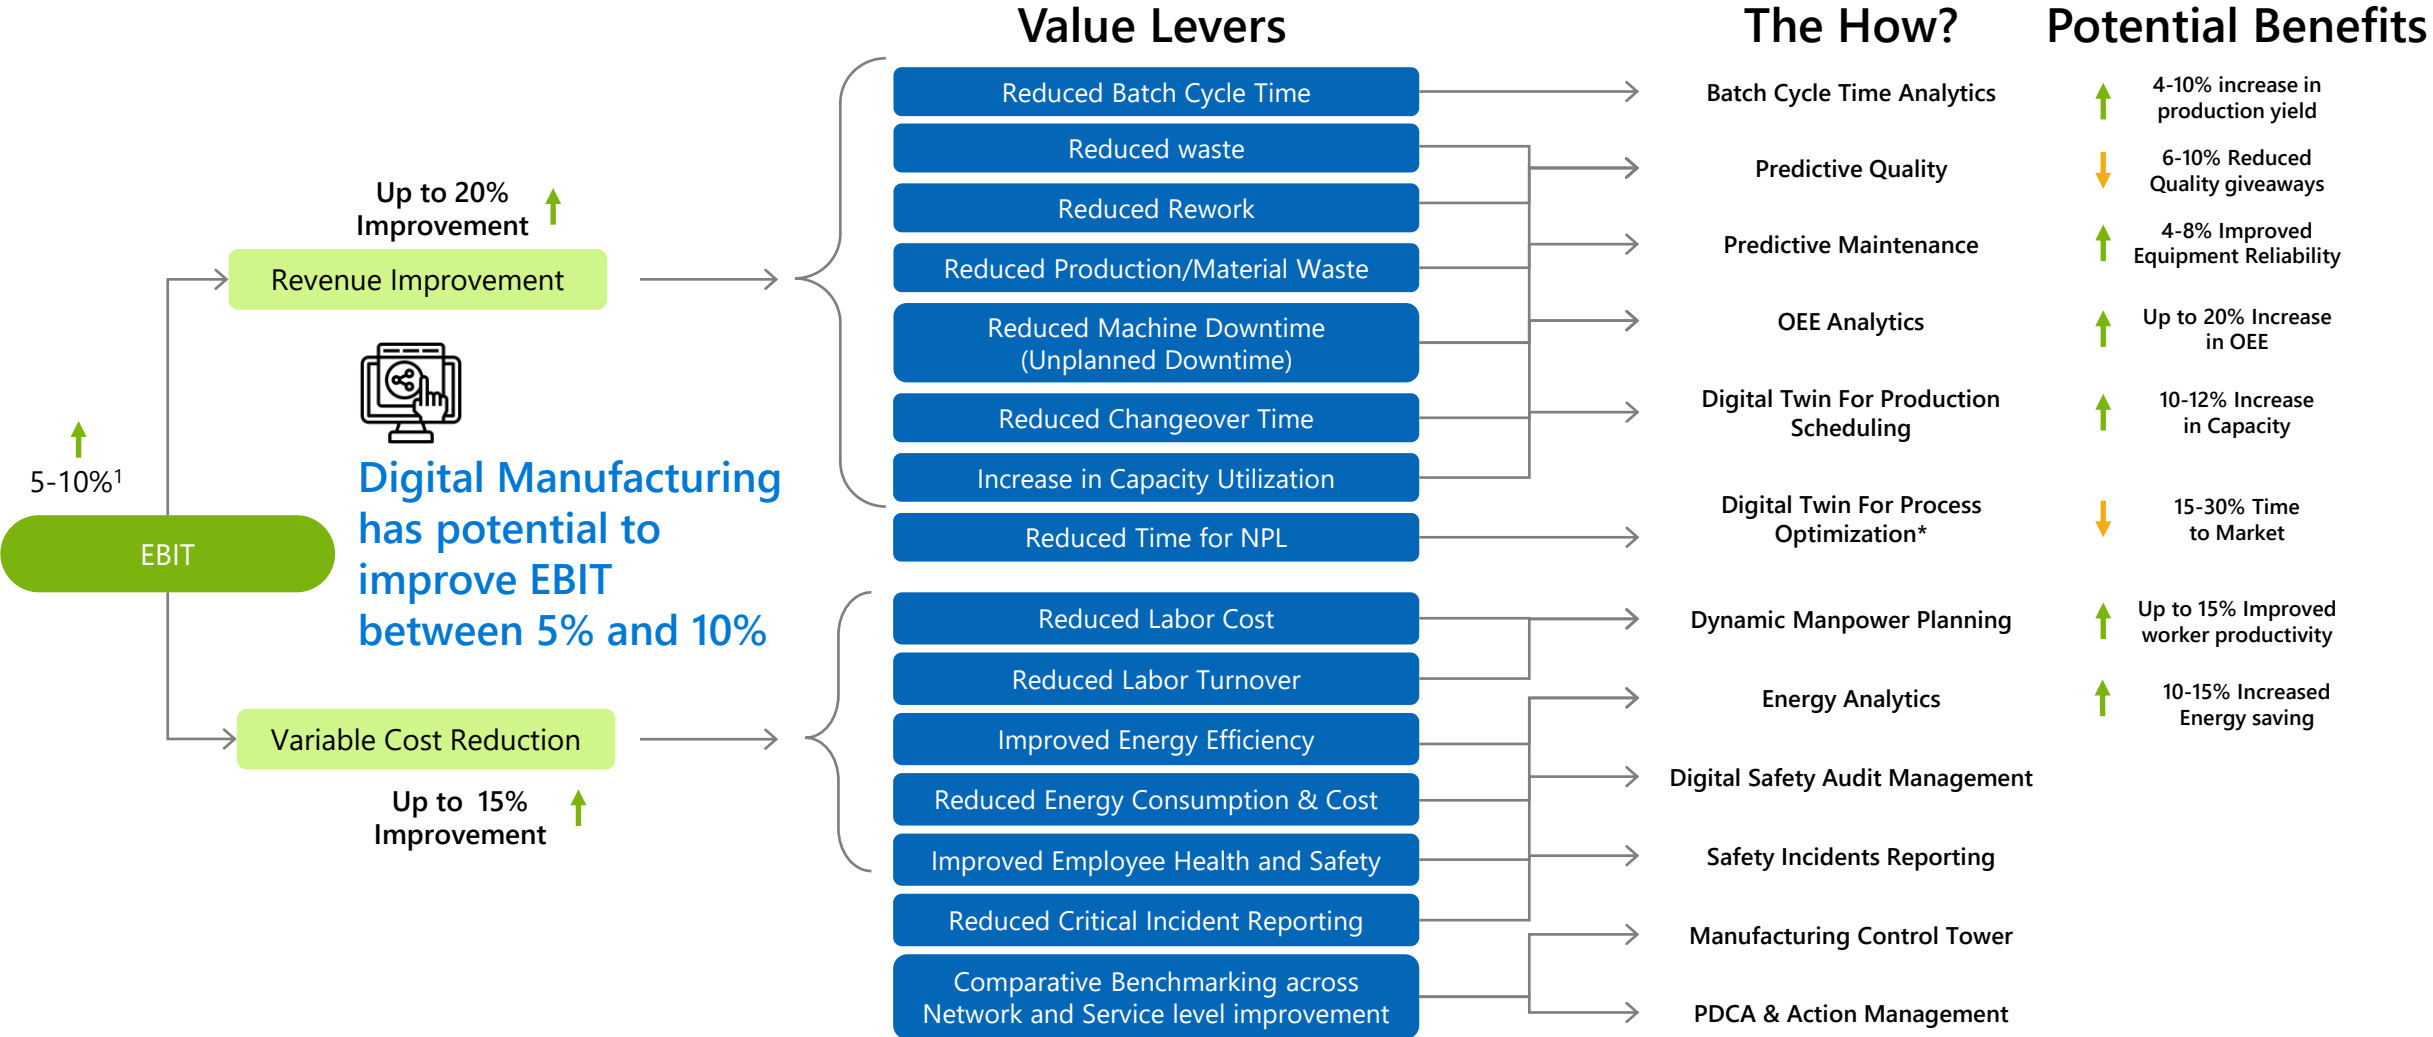

*the minimum
expectation they want
everywhere*

Enabling Business Results with AI and Digital Twins

Applying AI and digital capabilities to achieve transformative results

Applying AI and digital capabilities to achieve transformative results in Manufacturing Plants

Sustainability

15-25% Reduction in energy usage

Production

4-10% Uptick in production yield

People

15% increase in worker productivity

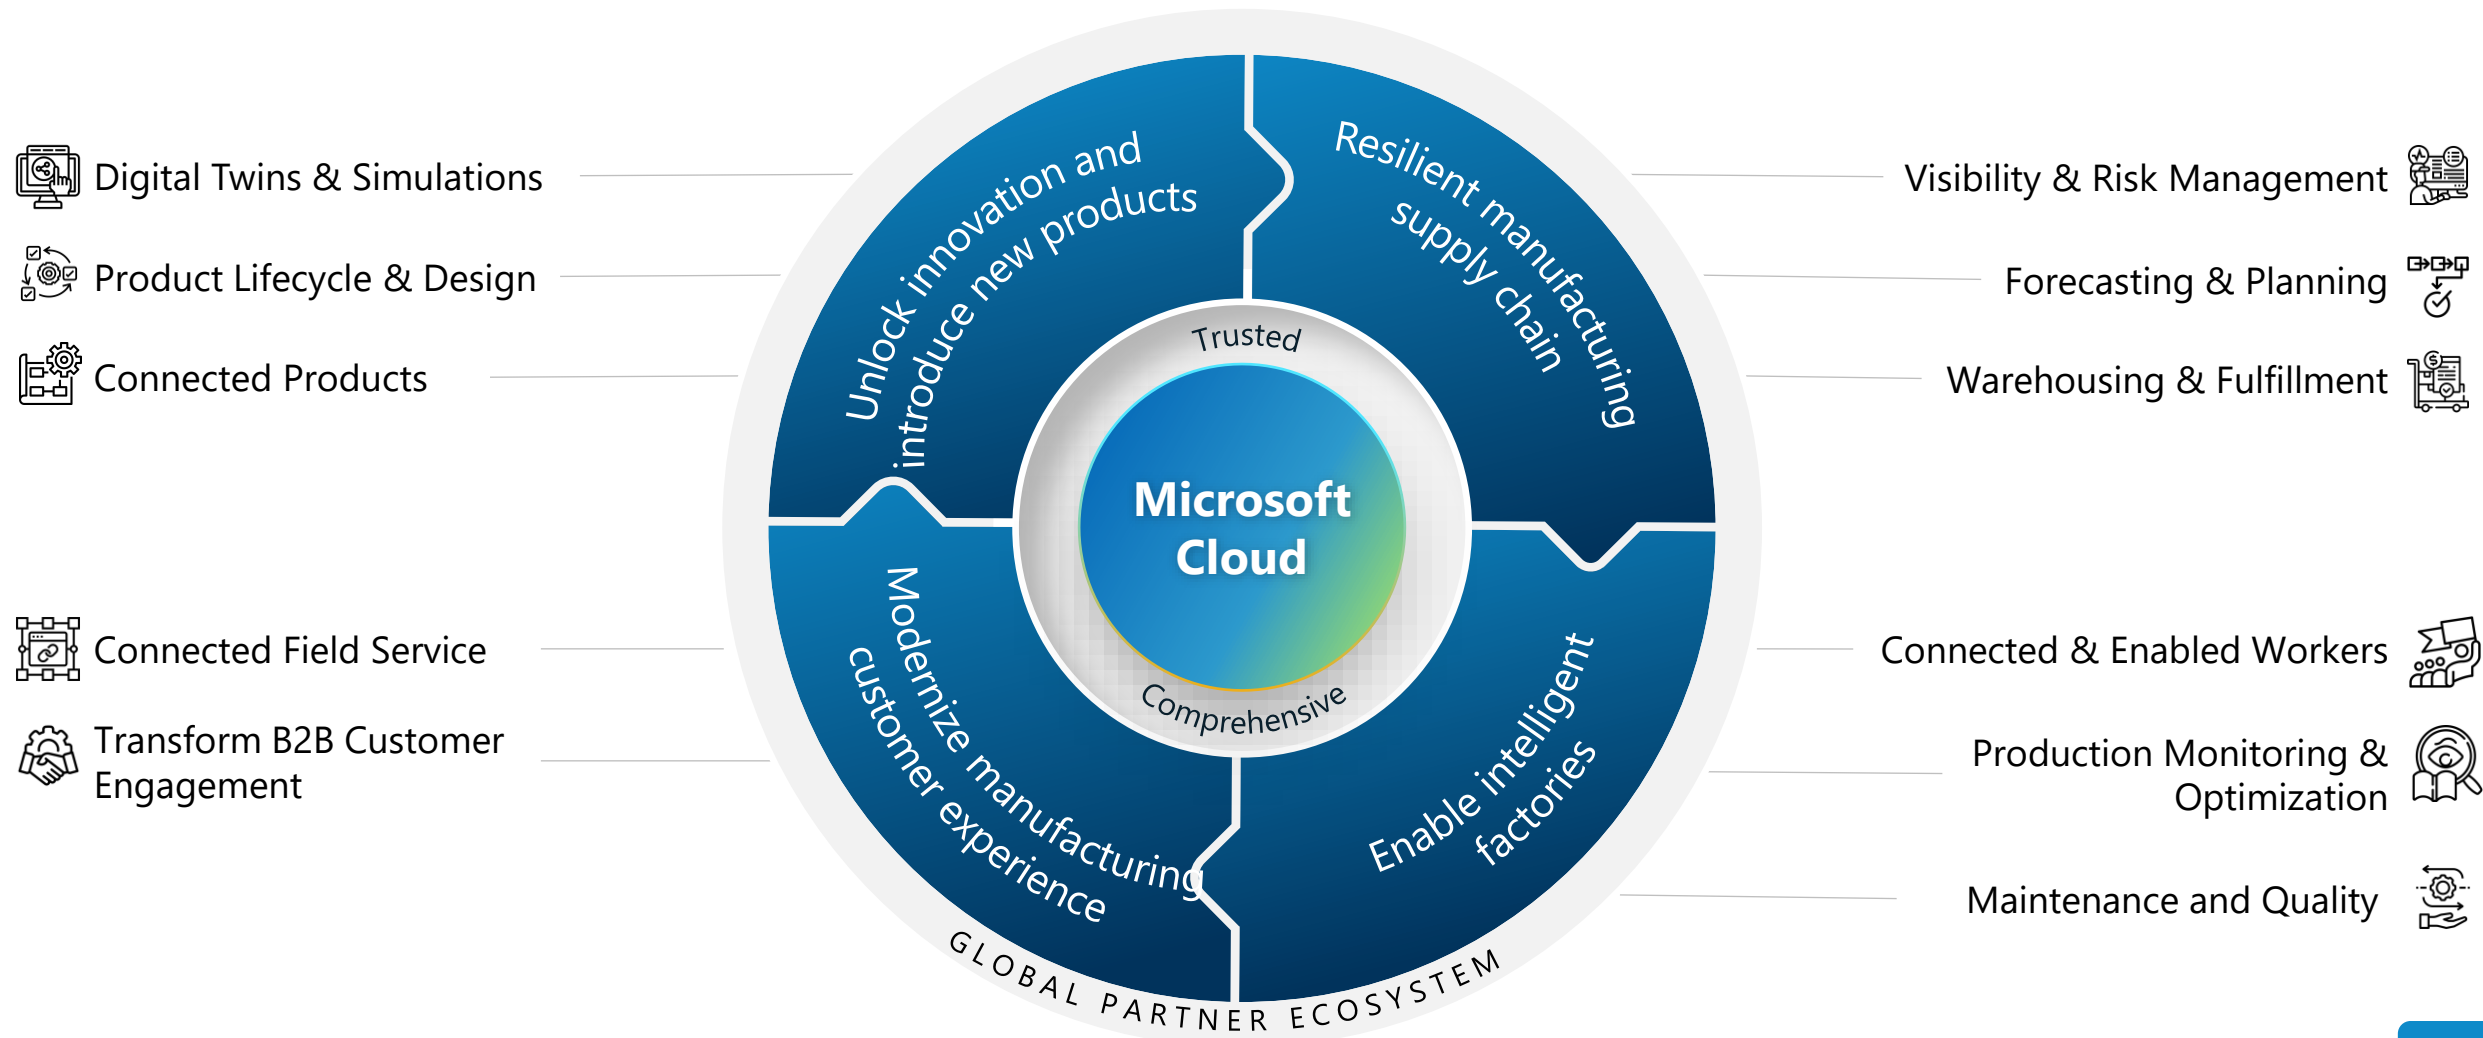

Waste

6-10% reduction in waste

AI Technology in Manufacturing

Unlock innovation, optimize operations, empower workers, and enhance the customer experience

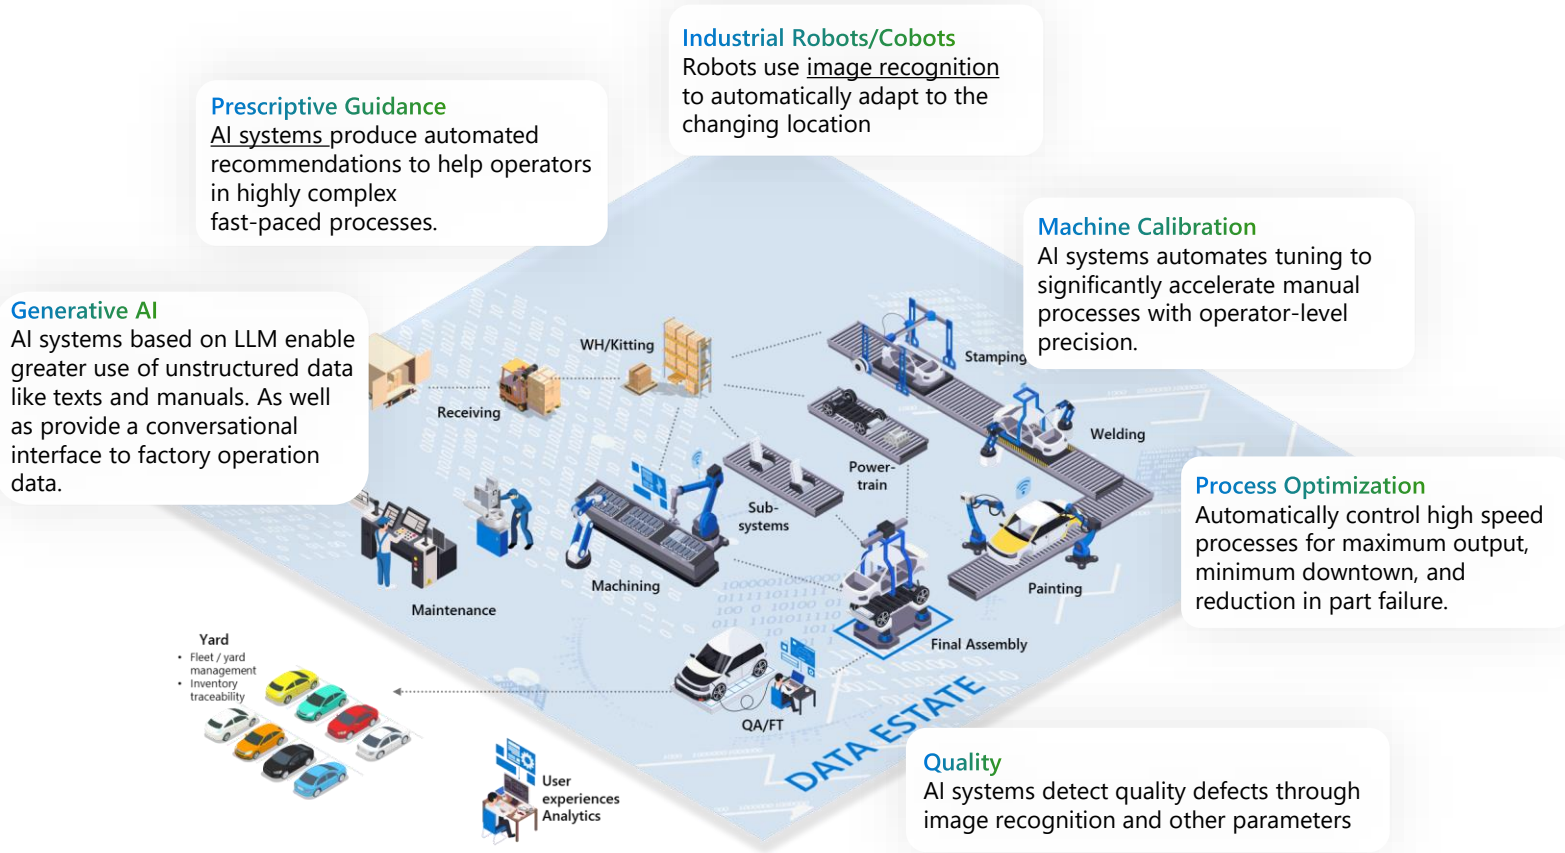

Using AI to Achieve Your Goals

A hand is holding a white question mark cutout against a large blue circular background. There are also smaller yellow and green circles on the page. The text is white and centered within the blue circle.

How are you
applying or thinking
of applying AI to
your construction
challenges?

AI and Machine Intelligence in Automation

Autonomous systems capabilities:

- **None:** No additional intelligence from machines
- **Advisory:** Machine provides insights, humans decide and act
- **Assistive:** Machine and humans work and act together
- **Autonomous:** Machine decides and acts independent of human

Capability Levels of Autonomous Things

Source: Gartner, Top 10 Strategic Technology Trends for 2019: Autonomous Things (March 2019)

AI Use cases in building facilities

Construction

- Site Planning and Analysis
- Building Information Modeling
- Autonomous excavation
- Prevention of cost overruns through use of historical data and subjective criteria

Plant Operations

- Intelligent remediation/troubleshooting assistance
- Training guide creation
- SOP checklist creation
- Maintenance schedule creation
- Equipment guide summarization

EHS

- Scanning job sites for potential safety risks
- Checklist creation for EHS procedures
- Semantic search for safety docs
- Safety Bot – Always on response to safety issues

Test within 30 seconds

Galaxy is an onsite rapid mycotoxin test using cutting-edge Artificial Intelligence enabled Hyperspectral Imaging.

Safety Test**

Machine Vision improves inspection efficiency

Augmenting human inspection capabilities through camera-based machine vision enables scenarios like complete inspection and reduction in false positives during defect detection.

Business Impact Example

- Double human inspection replaced by single human AI augmented inspection.
- 50% reduction in inspection time through faster defect detection.
- \$1.5M in labor cost savings for every 10 lines.

Industry: Manufacturing

Dow Chemical Company is a world leader in chemicals, plastics, synthetic fibers and agricultural products. Dow has tens of thousands of employees and operates plants in over 150 countries. Dow works with experts in almost every industry to help solve materials science challenges that prevent companies from growing and becoming more sustainable.

Founded: 1896

Objective

Operationalize a 33-stage generative molecular pipeline to leverage Azure DevOps and Azure Machine Learning Service. Through operationalization, Dow can realize the true value with a maintainable, extensible, scalable, and transparent ML Solution that can provide a core-service to Dow chemists globally.

AI-Driven Results

- ✓ **Separable and customizable CICD** - each module and library uses standardized and parametrizable build and release pipelines.
- ✓ **Rich telemetry** for audits and diagnostic allows for process traceability from the first commit to the final prediction
- ✓ **Extensibility** of the solution by refactoring the code base to layered services design with versioned libraries and modules
- ✓ **Scalability** using Azure Machine Learning Service compute and integrations

“Microsoft has created an amazing system ... we will surface additional needs for functionality that we want in the next round of collaboration.”

Principal Research Scientist and Sponsor
Dow Chemical Company

AI now analyzes all our real estate leases and identifies problems and irregularities with clear recommendations and next steps for new negotiations.

AI moves pretty fast, If you don't stop and look around once in a while, you could miss it.

Define the outcome

Reduce idle time in supply chain by 17% with real-time interactive reports

Save \$300,000 (USD) per day with predictive maintenance

Activate smart buildings for up to 20% energy cost savings

Save up to \$65/hour per month per analyst, increase of 97.5% accuracy

Personalized service across 1,400 locations

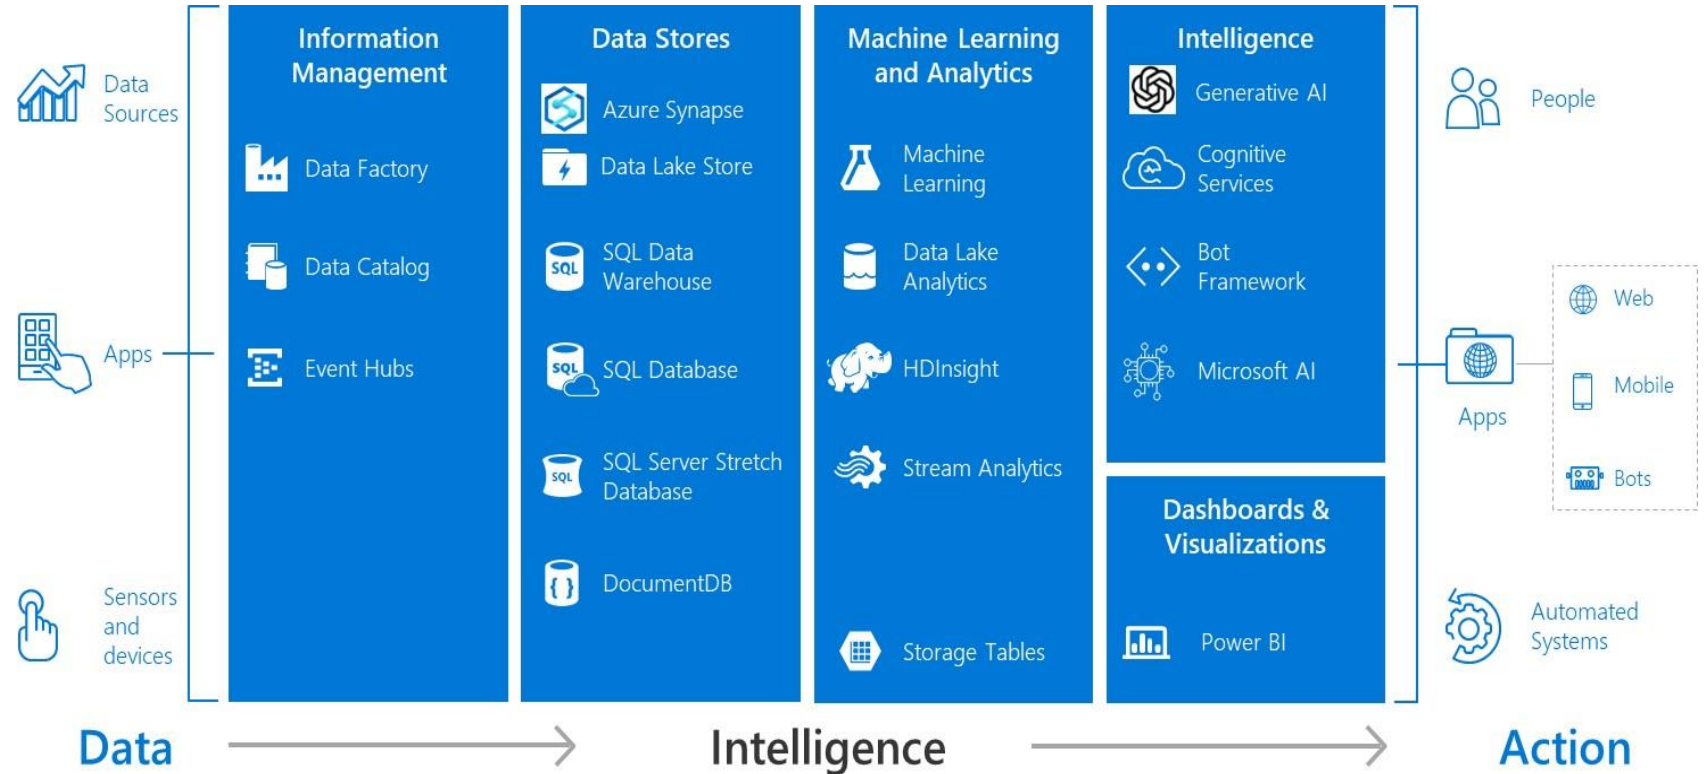

Predict student drop-out propensity; improve graduation rates by over 25%

AI Ready and Data Enabled

For AI to be effective, your data must be:

1. Understandable with the right context
2. Of high quality — accurate, complete, consistent, timely, unique
3. Well-governed to support ethical and compliant use of data
4. Available, discoverable, and accessible

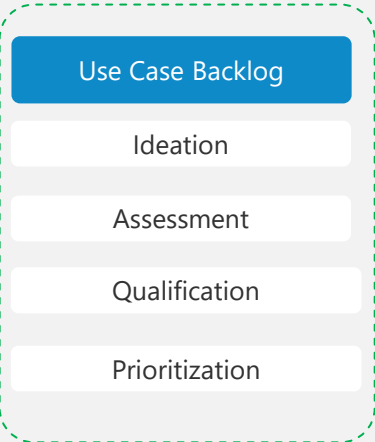

Applying AI in a Compliant and Responsible Manner

Industrializing AI for Business Results

1. AI Center Of Excellence

Streamlines capabilities and adoption, reducing the time and effort required to bring AI projects from concept to reality. Increases operational efficiency and reduces time-to-market.

2. Use Case Engine

Aligns AI initiatives with business objectives, ensuring resources are allocated to high-impact projects. Accelerates decision-making and increases business value.

3. Platform Capabilities

Speeds up the deployment process, ensuring that AI solutions can start delivering value as soon as possible. Increases business agility and allows for quicker realization of ROI.

Gain Visibility: AI and Digital Twins

What do you all think that a Digital Twin could mean to you and your teams when building a new facility?

Or uplifting a legacy facility?

Capabilities of a Factory Digital Twin

-  Collaboration in the Metaverse **1**
-  Remote Visibility Control Tower **2**
-  Integrated Planning & Scheduling **3**
-  Asset tracking & Digital Maintenance **4**

- 5** Factory Simulation & Root Cause Analysis 
- 6** Intelligent Process Control & Automation 
- 7** Connected Worker 
- 8** Energy Cost Optimization 

Digital twins enable informed action and control

Process control using digital twins

"What if" scenarios for emergency management

Power by the hour with asset tracking

Deeper collaboration across value chain

Remote Operations

Rewind and replay

Serialized asset tracking

Digital verification and validation

Digital Twins are helping JCI's customers and partners with

- 24/7 equipment performance monitoring and alarm management
- Proactive and predictive maintenance with actionable insights reduces downtime
- Optimize maintenance resource pool and incident response time

Approach to build Digital Twins at Scale

Build a Data Platform to break down data silos

Identify key use cases with the biggest impact

Bring the Future Factory vision to life rapidly through an MVP approach

Align with Stakeholders to validate the value and deploy at scale

Ensure you are compliant to your industry regulations
