

AROL USA, A Division of Angelus

AROL USA:

World Class Capping Equipment, Now with US Based Support and Service

AROL, a division of Angelus Sanitary Can Machine Company, is a leading manufacturer of capping equipment with an installed base of nearly 10,000 machines worldwide. With offices in the United States to support the head office in Italy and offices in France, AROL is positioned to provide the finest equipment and services around the globe to beverage, food, personal care, chemical, industrial and pharmaceutical products processors.

Flexibility, Reliability & Performance

Whether your organization needs individual capping or corking turrets, or complete freestanding machines, AROL can fill the order. Application solutions include:

- Corks, Crowns, Screw-Caps, Roll-On Caps, Push-On Caps
- Bench-top semi-automatic single station to 40 station high speed machines
- Stand alone or mono-blocked machines
- Dedicated cost effective single cap machines to Multi-closure easily converted solutions
- Flat continuous thread screw caps to Pumps & Sprayers
- Variety of head configurations
- Speeds from 3,000 to 48,000 bottles per hour.

Customer Service and Support from the US

The AROL USA team is dedicated to providing the exceptional customer service that the Packaging Industry demands. With close proximity to Atlanta/Hartsfield/Jackson airport they have the ability to quickly provide customer support for the USA and surrounding countries.

AROL USA Rebuild and Exchange Program

AROL USA has established a Loaner Program to reduce production down time for processors wanting to overhaul Capping Heads and Capping Spindles. Processors are provided with loaner assemblies while theirs are rebuilt at AROL USA by factory trained technicians. The AROL USA service group is available to assist customers at their facilities with the removal and reinstallation of the capping head or spindle assemblies or other service needs.
