

Lockwood Greene

Lockwood Greene (www.lg.com) is your global business partner for engineering and construction serving food & beverage clients throughout the U.S. and internationally. Founded in 1832, the company employs 2,200 professionals in 20 offices worldwide with a complement of resources to enable your successful product launch.

We provide the full range of traditional engineering and construction disciplines for planning, processing, packaging, warehousing and distribution. Lockwood Greene's food & beverage team minimizes the time it takes to get your capital project fully operational with testing, training, validation and start-up services to maximize your efficiency and help you seize that critical product-to-market window. Lockwood Greene is a wholly-owned subsidiary of CH2M HILL. (www.ch2m.com)

Meritech

Meritech, Inc. of Centennial, Colorado continues to add new products to its existing line of automated employee hygiene equipment. Meritech is well known in the food industry for its innovative technology in employee hand and boot washing/sanitizing equipment, all of which has automated this costly, time consuming process. Meritech is unveiling several new systems designed to meet the needs of many food

companies. The new CleanTech, 500EZ automated hand washing and sanitizing system is smaller and less expensive than the current CleanTech systems Meritech manufactures, while still providing the same benefits as the other CleanTech models. This system is all stainless steel, water tight with a wall-mount installation. The new ProTech Solution is a high

through-put, walk through hand and boot washing/sanitizing system. This system was designed for areas where there is a high volume of employees entering a clean area at one time and will wash and sanitize the hands and boots of 20 employees per minute. The ProTech Solution is also available as a "hands-only" system. For more information on these new products or their

existing hand and boot sanitizing equipment, call Meritech at (800) 932-7707 or visit their informative website at www.meritech.com.
