

ROCKWELL AUTOMATION

Rockwell Automation is a leading industrial automation company focused to be the most valued global provider of power, control and information solutions. With a focus on automation solutions that help customers meet productivity objectives, the company brings together leading brands in industrial automation, including Dodge® mechanical power transmission products, Reliance Electric™ motors and drives, Allen-Bradley® controls and engineered services and Rockwell Software® factory management software.

Rockwell Automation is the partner of choice for food and beverage manufacturers who want to meet their cost, quality, flexibility, and regulatory challenges – from raw material through final shipment.

Rockwell Automation Food Manufacturing Optimization solutions focus on the business issues facing the food industry and address every phase of food manufacturing operations. Elements of the solutions include products (field devices, power systems, control systems, visualization platforms, information systems) and services (consulting, project management and implementation, support) required to address production process challenges. Rockwell Automation's domain expertise in automation and manufacturing execution and information systems provides solutions for process, continuous and hybrid manufacturing environments. Solutions are built on an information-enabled architecture designed to improve integration with enterprise business systems. Rockwell Automation's manufacturing experience, breadth of product offerings, and technical services help companies optimize their utilization of valuable and limited human, physical and financial assets, while minimizing waste and satisfying consumer and retailer demands.

Rytec

Rytec Corporation is a leading U.S. manufacturer of high-speed rolling and folding doors for industrial, commercial, cold storage, food and pharmaceutical applications. The Rytec Clean-Roll high-speed door combines the requirements of a hygienic/clean-room door with the benefits of a high-speed door. The unit is designed for food processors, including poultry companies, to meet high standards for cleanliness while saving energy and increasing productivity. It complies with USDA standards. Through its high-speed operation (32 inches/second), it helps maintain constant temperature and minimize the spread of airborne pathogens. The door's modular design provides for quick and easy installation.
