Armstrong International, Inc.

Armstrong Takes the Worry out of Your Hot Water

When you need consistent, reliable hot water for food processing or washdown in your facility, Armstrong can deliver a package that's right for you.

For industrial-process, hot-water applications, the compact Flo-Direct® Direct Contact Gas-Fired Water Heater is the most efficient way to generate hot water quickly. To maximize the efficiency of your commercial or industrial domestic hot-water system when steam is available, our Flo-Rite-Temp™ Instantaneous Water Heater maintains accurate control – consistently and reliably. We can also customize our hot-water products to accommodate special applications. And best of all, Armstrong frees you from all hot-water worries throughout your operation. We draw on decades of knowledge and expertise in utility system management to precisely install and dependably maintain your hot-water system.

For more than 100 years, Armstrong has been providing complete utility system solutions through products, education and training. Because we know plant managers are always looking for ways to make their facilities more efficient, we offer total system solutions for steam, air and hot water.

In addition to energy- and cost-saving products, Armstrong provides comprehensive services. We offer turnkey installation, operation and maintenance services; steam and compressed air system audits; steam trap management; process drying optimization; condensate system improvement; insect heat treatment; and hot-water solutions for process, safety, sanitation and domestic applications – all of which can be customized to help improve your bottom line. To learn more, contact Armstrong or visit our Web site today.

Atlas Minerals & Chemicals

ATLAS MINERALS & CHEMICALS is the most experienced and diverse manufacturer of corrosion resistant construction materials to serve the food and beverage industry.

Atlas manufactures product systems from several highly resistant resins such as epoxy, novolac epoxy, vinyl ester, and furan. Diversity in the types of materials and systems enables Atlas to provide you with the best possible system for your operating environment.

Patented in 1952, the FURNANE® System remains the ultimate choice for food and beverage plant flooring. Some areas of the plant may be better suited for polymer concrete, linings, seamless flooring, or coatings. Low joints in existing brick and tile flooring can be easily repaired with REZKLAD® HP GROUT. Whatever the need, Atlas has the solution.

At Atlas, we can proudly say that every one of our products is the result of over 100 years of experience and an innovative spirit. That unique combination of vision and capability makes us the top choice for food and beverage producers. To learn more about our company and what we can do for yours, call 800-523-8269 or visit us online at www.atlasmin.com.
