Prime Coat Coating Systems

Prime Coat Coating Systems is your turnkey source for decorative and defensive coatings solutions. Prime Coat Coating Systems is unique in that we both manufacture and install our coatings. This process not only insures a high quality installation and long lasting performance, but it also takes away the finger pointing that is so common in the coatings industry.

A Prime Coat Coating System includes professional analysis of your facility by a NACE engineer, proper surface preparation, proprietary coatings and patent-pending systems, that are only installed by our trained employees. The results of this process are improved quality, unsurpassed customer satisfaction and a Prime Coat Coating Systems performance guarantee!

Our systems include light, medium and heavy duty floor, wall, ceiling and specialty coatings. We manufacture and install 100% Solids Epoxies, Fiberglass Reinforced Epoxies,

Polyaspartic Coatings, Polyurea Coatings, Membrane Coatings, Urethanes, Urethane Mortars and Vinyl Ester Coatings.

Contact us today for more information, pricing and expert assistance.

Decorative and Defensive Coating solutions from a single source.

Reiser

Where Service is Part of the Process

Reiser recognizes that you require a dedicated and knowledgeable support network to guarantee your satisfaction. We have put together an after-sales support group that is well-known in the food industry. They are experts on our full line of food processing and packaging equipment and understand your application requirements. Their goal is to keep you up and running.

Vemag HP202 Linker with a 204 Hanger.

Experience Commitment

In conjunction with our customer support group you have a team dedicated to:

- extensive research and development
- A product development facility and test kitchen to ensure quality
- customized training specific to your organization needs
- maintaining a comprehensive parts inventory to minimize downtime

Repak RE15 Form-Fill-Seal Packaging Machine

Industry Leader
