VAC-U-MAX

VAC-U-MAX specializes in the design and manufacture of pneumatic systems and support equipment for conveying, weighing and batching of dry materials. The company also designs and manufactures heavy duty industrial vacuum cleaners, ranging from small air and electric powered drum styled units to large electric and diesel powered units.

VAC-U-MAX equipment and systems are sold worldwide. In addition to food applications, major markets for conveying systems include the chemical and pharmaceutical industries. A UL-listed designer and manufacturer of control panels, VAC-U-MAX also furnishes integrated control systems that provide coordination of material movement, batching, and processing, with tie in capabilities to existing control systems.

Bulk Bag Unloader

Topper Feeder System provides even coverage and eliminates hand loading.

Customer's materials can be tested for flow characteristics and other qualities under simulated conditions in the company's well-equipped test laboratory. Complete installation, startup, operator training and follow-up support are offered.

Made in America, VAC-U-MAX systems are backed by the company's exclusive "Airtight Performance Guarantee™." Major products include:

- Multi-ingredient storage batching, and processing systems
- Material transfer systems
- Bulk bag loaders and unloaders
- Bag dump stations and empty bag compactors
- Feedbins
- Material receivers
- Filter assemblies and media, including HEPA
- Electric, pneumatic or fuel powered vacuum cleaners and systems
- Diverter valves
- Drum dumpers
- Ergonomic load lifters
- Sanitary components designed to 3A standards and accepted by USDA for food handling
- UL-listed control panels from with illuminated system displays
- Mobile conveyors
- Pneumatic and aero-mechanical conveyors

VAC-U-MAX

Viatran Corporation

Introducing, the Viatran Sanitary Family of Solutions.

Established in 1965, Viatran celebrates 40 years of solving pressure and level measurement applications. With 40 years of experience, our line of Sanitary Pressure and level measurement instruments offers just about any solution for your Food Processing needs.

Our products are rugged: they will recover in less than a minute after a CIP process, fast becoming critical in niche processing plants. The need for Hastelloy wetted parts is a standard request, so it's a standard feature on Viatran transmitters. All-welded, our products are 3A approved and Industry tested.

If drift is an issue in your plant, then talk to us about getting an evaluation unit from Viatran. Our customers have enjoyed doing away with constant adjustments caused by drift.

With 40 years of experience, we can help you with your processing needs. For even more experience, we've merged with Dynisco (55 years of experience in pressure and level measurement) to offer an experienced engineer to order option for your processing applications.

All products in the above image are currently available. For details, visit www.viatran.com or contact a member of the Sanitary Market Service Team at 1-800-688-0030, ext 506.
