## LEESON Electric

### 2007 International Poultry Expo

LEESON Electric manufactures AC & DC motors, AC & DC sub-fractional right angle and inline gearmotors, fractional and integral horsepower speed reducers, and Speedmaster AC and DC electronic drives. LEESON will be introducing a line of Encapsulated Stainless Steel Motors in 2007. This will be a great addition to our line of Washdown-duty motors, gear reducers, gearmotors and controls that meet the demanding needs of the applications that are used in the Poultry Industry.

Booth #: 1664

## Lubriplate Technology

### Lubriplate SFGO Ultra

Series brings advanced synthetic technology to food machinery lubrication.

These high-performance, NSF H-1 Registered, Polyalphaolefin (PAO)

based synthetic fluid lubricants have been designed to meet the demands of a wide variety of applications thus reducing the need to inventory a myriad of application specific lubricants. They can help you consolidate, simplify and reduce your lubricant inventory. Lubriplate SFGO Ultra Series lubricants are recommended for air compressors, hydraulic systems, bearings, gearboxes, pumps and chains. They are certified OU Kosher Pareve. Available in 13 ISO viscosity grades.
